SUMMARY

Java Backend Developer skilled in building scalable backend systems using Java, Spring Boot, and RESTful APIs. Strong understanding of core concepts including multithreading, concurrency, collections, and system design. Experienced in MySQL for data modeling and optimization, and AWS (EC2, S3, IAM) for cloud deployment. Proficient in DevOps tools including Jenkins, Docker, and Kubernetes for CI/CD and containerized microservices. Focused on writing clean, maintainable, production-ready code in Agile environments.

EXPERIENCE

Software Engineer

Quicktouch Technologies Ltd

07/2024-04/2025, Bangalore

- Built subscription and plan management system with payment gateway integration supporting multiple billing cycles (quarterly, half-yearly, yearly).
- Developed leave management workflow with automated email notifications for application, approval, and rejection updates.
- Implemented reimbursement management module for user submissions and admin review process.
- Designed task management system with assignment, tracking, deadlines, status updates, comments, and activity history.
- Optimized APIs using Redis caching, SQL tuning, and rate limiting, reducing latency by 60%.
- Developed and maintained REST APIs in a microservices architecture, resolving production issues and improving performance.
- Tech Stack: Java, Spring Boot, Microservices, Maven, PostgreSQL, Redis, JPQL, Hibernate.

Associate Software Engineer

Darby Telematics

2017-2020, Bangalore

- Integrated vehicle hardware data to capture real-time metrics such as fuel levels, emissions, and pollution, enabling accurate monitoring and analysis.
- Built RESTful APIs for secure, scalable data ingestion and processing in a microservices architecture.
- Collaborated with cross-functional teams to deliver reliable vehicle data solutions and ensure seamless system integration.
- Developed and maintained APIs, resolving production issues and improving system performance.
- Tech Stack: Java, Spring Boot, Microservices, Kafka, MySQL, Redis, Hibernate, Kibana.

SKILLS

Languages: Java, JavaScript, SQL, JPQL, HTML, CSS

Technologies & Tools: Spring Boot, Microservices, Maven, Hibernate, JDBC, OOPS, REST APIs, MySQL, Git, Kafka, Redis, RDBMS, AWS, Docker, CI/CD, Kubernetes

EDUCATION

Full Stack Development

Masai • Bangalore • 09/2025 - Present

- Data Structures and Algorithms, HTML, CSS, JavaScript, JAVA, Spring Boot, Object Oriented Programming, Databases.

Bachelor of Computer Application

Chaudhary Charan Singh University • Meerut • 2022

- Object Oriented Programming, Databases, Discrete Maths, Data Structures and Algorithms, Networks, HTTP Protocols.
-
