SUMMARY

Java Backend Developer skilled in building scalable backend systems using Java, Spring Boot, Spring AI, and RESTful APIs. Strong understanding of core concepts including multithreading, concurrency, collections, and system design. Experienced in MySQL for data modeling and optimization, and AWS (EC2, S3, IAM) for cloud deployment. Proficient in DevOps tools including Jenkins, Docker, and Kubernetes for CI/CD and containerized microservices. Also experienced in frontend development using React and Tailwind CSS for building responsive and modern user interfaces. Focused on writing clean, maintainable, production-ready code in Agile environments.

EXPERIENCE

Software Engineer

Quicktouch Technologies Ltd

September 2025 - May 2026, Delhi

- Developed a Leave Management Workflow with automated Email Notifications for application, approval, and rejection updates.
- Implemented a Reimbursement Management Module for user submissions and admin review processes.
- Design a Task Management System with assignment, tracking, deadlines, status updates, comments, and activity history.
- Optimized APIs using Redis Caching, SQL Query Tuning, and Rate Limiting, reducing latency by 60%.
- Tech Stack: Java, Spring Boot, Microservices, PostgreSQL, Redis, Hibernate/JPA, JPQL, Maven.

Associate Software Engineer

Darby Telematics

July 2024 - April 2025, Bangalore

- Integrated vehicle hardware data to capture real-time metrics such as fuel levels, emissions, and pollution, enabling accurate monitoring and analytics.
- Built RESTful APIs for secure and scalable data ingestion within a Microservices Architecture.
- Leveraged Apache Kafka for reliable real-time data processing and communication between services.
- Collaborated with cross-functional teams to deliver robust vehicle data solutions and ensure seamless system integration.
- Developed and maintained Spring Boot APIs, resolved production issues, and improved overall system performance.
- Tech Stack: Java, Spring Boot, Microservices, Apache Kafka, MySQL, Redis, Hibernate, Kibana.

PROJECT

Nexora

github.com/Prithvi333/Nexora

- Built a microservices-based e-commerce platform with Spring Boot, React, and MySQL.
- Secured APIs with Spring Security, JWT authentication, and role-based access control.
- Configured Spring Cloud Gateway for API routing, authentication, and rate limiting.
- Implemented event-driven communication using Apache Kafka for asynchronous inter-service messaging.
- Improved performance through Redis caching and optimized MySQL database access with JPA/Hibernate.
- Automated build and deployment workflows using Jenkins CI/CD and Git.
- Implemented centralized logging, validation, exception handling, pagination, and DTO-based architecture.

EDUCATION

Full Stack Development

Masai • Bangalore • 2023

- Data Structures and Algorithms, HTML, CSS, JavaScript, JAVA, Spring Boot, Object Oriented Programming, Databases.

Bachelor of Computer Application

Chaudhary Charan Singh University • Meerut • 2020

- Object Oriented Programming, Databases, Discrete Math, Data Structures and Algorithms, Networks, HTTP Protocols.

SKILLS

Languages: Java, JavaScript, SQL, JPQL, HTML, CSS

Technologies & Tools: Spring Boot, Spring AI, Microservices, Maven, Hibernate, JDBC, OOPS, REST APIs, React, Tailwind CSS, MySQL, RDBMS, Kafka, Redis, Git, AWS, Docker, CI/CD, Kubernetes
