Professional Summary

Excellent problem-solving skills and ability to perform well in a team and grow and develop own skills as developer. Strong understanding of web development and programming techniques and tools. Ability to work independently or with a group.

Skills

Languages: Java, JavaScript, Python, SQL, JPQL, HTML, CSS

Technologies & Tools: Spring Boot, Microservices, Gradle, Maven, Hibernate, JDBC, OOPs, REST APIs, MySQL, Postgres, Git, Postman, Kafka, Redis, RDBMS

Work Experience

Quicktouch Technologies Ltd, Delhi

Sep 2025 - Present

Software Engineer

- Built a complete subscription and plan management system.
- Integrated payment gateways, supporting quarterly, half-yearly, and yearly billing cycles.
- Implemented a leave management workflow with automated email notifications, where an email is triggered to the reporting manager upon leave application. Additionally, integrated status-based notifications to inform employees via email when their leave request is approved or rejected, ensuring clear communication and real-time updates.
- Developed a reimbursement management module supporting both user and admin workflows, enabling employees to submit reimbursement requests and administrators to review them.
- Designed and developed a task management system to assign, track, and manage employee tasks with defined deadlines and real-time status updates. Implemented task history tracking and comment functionality to maintain activity logs and enable seamless communication, improving transparency and team collaboration. % uptime.
- Optimized APIs with Redis caching, SQL tuning, and rate limiting, cutting latency by 60%.
- Developed and maintained REST APIs, resolving production bugs and improving system performance.
- Java, Spring Boot, Microservices, Maven, Postgres, Redis, JPQL, Hibernate

Darby Telematics, Bangalore

July 2024 - April 2025

Associate Software Engineer

- Worked on integrating data from hardware devices installed in vehicles to capture real-time metrics such as fuel levels, emissions, and pollution data. Implemented efficient data processing and monitoring mechanisms to ensure accurate tracking and analysis of vehicle performance and environmental indicators.
- Implemented RESTful APIs for efficient data ingestion and analysis, ensuring secure, scalable, and high-performance data processing across the system.
- Collaborated with cross-functional teams, including support engineers and frontend developers, to design and deliver robust and scalable vehicle data solutions, ensuring seamless integration and improved system reliability.
- Developed and maintained REST APIs, resolving production bugs and improving system performance.
- Java, Spring Boot, Microservices, Kafka, MySQL, Redis, Hibernate, Kibana

Education

Masai, Bangalore

2022 - 2023

Full Stack Development

Relevant Coursework: Data Structures and Algorithms, HTML, CSS, JavaScript, JAVA, Spring Boot, Object Oriented Programming, Databases,

Chaudhary Charan Singh University, Meerut

2017 - 2020

Bachelor of Computer Application

Relevant Coursework: Object Oriented Programming, Databases, Discrete Maths, Data Structures and Algorithms, Networks, HTTP Protocols
